

# EasiPrint

*The Solution of Choice for Digital Printing*

Workflow for Production Digital Printers:

KM C6500/C6501

HP Indigo C3500, C5500 C3050 C5000 7000

Oce Varioprint 6250/6160/6200, Varioprint 2110/4120

Infoprint 2190/2210/2235

EasiPrint, Founder’s newest controller technology for production printing, graphic and corporate environments, offers a flexible, scalable solution with all the required functionality included in the base product. With its process automation, color management, high productivity and extended customer connectivity, EasiPrint’s portfolio extends beyond any other industry offering and provides VDP tools in optional packages for customers with extreme requirements. It also delivers the most comprehensive security tools to meet stringent government and corporate standards. The system delivers fast, industry-leading and adaptable workflows that connect and integrate with existing customers’ environments.

## Basics

Equipped with EasiPrint, production digital printers can do better to provide outstanding print quality, impressive media flexibility, comprehensive in-line finishing capabilities – meeting the challenges of professional high-speed digital colour printing with optimized workflow solutions and simply brilliant results. Supported by EasiPrint, these digital production devices offer these key benefits and much more:

- The intuitive WYSIWYG interface
- Optimized workflow control with state-of-the-art software
- Imposition and composition for fast, accurate output
- Outstanding colour and image quality
- Spot colour editor for full colour control and easy customization

## Highlights

- Optimized for variable data printing  
 The Variable Data Print (VDP) module uses an advanced data composition and industry standard XML format technology which leverages comprehensive VDP solution. It can efficiently process even the most complex variable data jobs. Its support for popular VDP applications and all leading industry formats, including VDX, PDF, and ADOBE POSTSCRIPT, allows you to quickly create full-color personalized documents from postcards to brochures. EasiPrint VDP solution also offer scalable tools for producing effective one-to-one marketing campaigns and lead the print industry in speed, ease-of-use and flexibility.
- One platform – comprehensive solutions  
 EasiPrint can connect the following printers and support parallel output which improve productivity and reduce error.

KM C6500/C6501  
HP Indigo C3500, C5500 C3050 C5000 7000  
Oce Varioprint 6250/6160/6200  
Varioprint 2110/4120  
Infoprint 2190/2210/2235

- **Optional Ultra speed RIPs**  
Enables auto load balancing across many RIPs. Automatic load balancing on this print server enables efficient use of resources. Take advantage of the speed and ease of a print server that automatically determines which RIP resources are available and then routes jobs accordingly.
- **Realtime smart Work Stage controller**  
With Work Stage, easy coordination of each step in the workflow allows many users to work seamlessly on the same job. In EasiPrint, appointed jobs working procedures and authorizations can be precisely controlled for maximum efficiency.
- **Flexible and convenient PDF tools**  
Flexible workflow tools improve performance and make last-minute corrections fast and simple. PDF compilation has powerful functions including export, zoom, rotation, cut, merger, split, add anti-copy background, remove, displace, and add page number.

## Features

- Powerful VDP capabilities
- Integrated image tools
- Powerful PDF edit capability
- Advanced 3D preview
- Advanced security features
- Applied outputting queue controller
- Automation through virtual printers and hot folders
- Work with low-resolution images and apply the high resolution while printing
- Easy setting of automated workflow for repeated processes and parameters
- User-customizable job templates
- Built-in, customized, professional color management tools
- Simple to learn and operate
- Easy defining of job parameters from your client workstation – saves time and resources
- Hundreds of imposition templates that can be applied to different selected jobs
- Comprehensive file type compatibility
- Operates in both Windows and Macintosh environments
- Fully Integrated JDF / PDF pre-press workflow, enabling an automatic, reduced operating costs; and improved quality.

## Operating environment

### Recommended server console system configuration

#### Hardware environment

**CPU:** dual-core with single CPU over 3.0G

**Memory:** 2G and above

**Hard Disk:** 160G, broadband SCSI

**Display:** 1024 × 768 24 bit true color display mode

PCI-X slot (If connect with KMC6500/C6501)

#### Server operating system:

Windows XP + SP2 or Windows 2003 server+SP2

### Client operating environment

#### Hardware environment

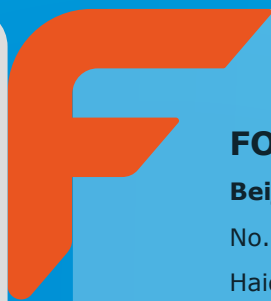

**CPU:** PIII 1G or more

**Memory:** not less than 256MB

**NIC:** 100M Ethernet

#### Client operating system:

Windows XP + SP2 / MAC OS 10.6.1 above
